DEMIANUS TOATUBUN

RIKO TRONIC · Web3 Developer · On-chain Analytics

ABOUT

Economics graduate who started coding in April 2026 and now ships full-stack Web3 applications: Solidity contracts tested with Foundry, on-chain data indexed with Ponder and The Graph, and Next.js frontends that let users check every transaction on-chain. I bring an economist's view to protocol design, incentives and on-chain data.

EXPERIENCE

Asisten Pranata Komputer (Intern)

Sep 2026 - Mar 2027

BPS Kota Tual · Maganghub Kemnaker internship program (6 months) · Tual, Indonesia

Built a web app for the office's best-performing employee assessment (login, scoring form, automatic ranking recap), kept in a private repository to protect staff data. Built the Economic Census training form with Google Apps Script, handled anomaly data entry in FASIH (BPS's official data app), and worked on census area maps in QGIS.

Web app · Google Apps Script · FASIH · QGIS

Independent Web3 Developer

Apr 2026 - Present

Self-directed · Remote

Went from zero coding experience to five hosted projects and nine deployed, verified smart contracts (seven on Ethereum Sepolia, two on BNB Chain Testnet), covered by 129 Foundry tests across two contract suites.

Solidity · Foundry · Next.js · wagmi · viem · Ponder · The Graph

Market Analyst & Trader

2023 - 2025

Independent · Crypto and multi-asset markets

Traded crypto, forex and equities using macro analysis, technical analysis (Fibonacci, MACD, SMC/BOS/CHoCH) and on-chain data.

PROJECTS

BanSOSChain

Indonesia Web3 Hackathon 2026 submission

Solidity · Foundry · BNB Chain · Ponder · Next.js · wagmi · viem · LLM review

Disbursement proof layer for social aid. Every proposal, approval, payout and public objection is recorded on-chain and linked to BscScan. An AI service checks each application against the program's criteria, a 24-hour objection window runs before funds move, and a Ponder indexer on Railway feeds a public audit dashboard. Two contracts verified on BscScan; 22 tests with 100% line, branch and function coverage.

→ bansoschain.vercel.app

TronicLens

Live

React · Solidity · Foundry · The Graph · Chainlink · 0G

DeFi staking analytics dashboard: staking activity and whale tracking from a subgraph published to The Graph Network on Arbitrum One, Chainlink price feeds, on-chain governance with timelock execution, and AI insights via 0G Compute. Three contracts verified on Sepolia; 107 Foundry tests (unit and fuzz), 98% line coverage, no high-severity Slither findings.

→ troniclens.vercel.app

Earlier projects

Live

DeFi Dashboard (React, wagmi, Dune API) and Crypto Tracker (React, CoinGecko API).

→ defi-dashboard-pi.vercel.app · crypto-tracker-pi-silk.vercel.app

TRAINING

Online Web3 Workshop Series

Jul - Aug 2026

Binance Academy · BNB Chain · Coinvestasi, mentored by Dev Web3 Jogja

Attended all nine sessions (certificate of participation). Built a bounty escrow system on BSC Testnet: contracts with 48 tests and 100% coverage, a Ponder indexer, and an AI oracle hardened against prompt injection.

EDUCATION

Bachelor of Development Economics

2021 - 2025

Universitas Dokter Husni Ingratubun (UNINGRAT) · Tual, Indonesia

Thesis: effect of electronic money and inflation on Indonesia's economic growth, 2014-2023 (regression analysis in SPSS).

SKILLS

SMART CONTRACTS

Solidity, Foundry (unit, fuzz, coverage), OpenZeppelin, Slither, Hardhat

FRONTEND

Next.js, React, TypeScript, Tailwind CSS, GSAP, Vite, HTML/CSS

WEB3 LIBRARIES

wagmi, viem, ethers.js, Reown AppKit, RainbowKit, TanStack Query

INDEXING & DATA

Ponder, The Graph, GraphQL, Chainlink, Dune Analytics

CHAINS

BNB Chain, Ethereum (Sepolia), 0G

INFRASTRUCTURE

Vercel, Railway, PostgreSQL, Git, GitHub Actions

ANALYSIS & OFFICE

SPSS, EViews, QGIS, Google Apps Script, MS Excel, Word, PowerPoint, Canva, CapCut

BACKGROUND

Macroeconomics, trading, DeFi mechanics, protocol economics

LANGUAGES

Indonesian - Native

English - Professional
