SKILLS

FRONTEND

React, Next.js, TypeScript, JavaScript, Vite, Framer Motion, HTML/CSS

SMART CONTRACT

Solidity, Foundry, Hardhat, OpenZeppelin, Slither

WEB3 LIBRARIES & PROTOCOLS

The Graph, Chainlink, OG Storage, OG Compute, IPFS, wagmi, viem, ethers.js, Reown AppKit, RainbowKit

TOOLS & ANALYTICS

Dune Analytics, Alchemy, Vercel, Git, Remix IDE

PRODUCTIVITY & DESIGN

MS Word, MS Excel, PowerPoint, SPSS, EViews, Canva, Photoshop, Filmora, CapCut

BACKGROUND

Macro Analysis, Trading, DeFi Mechanics, Protocol Economics

LANGUAGES

Indonesian — Native
English — Professional

DEMIANUS TOATUBUN

RIKO TRONIC — Web3 Developer · On-chain Analytics

ABOUT

Economics graduate turned self-directed Web3 developer, building full-stack dApps across the Ethereum ecosystem — from smart contracts and wallet integrations to real-time analytics dashboards and on-chain data indexing. Comfortable across the stack: Solidity contracts, decentralized protocols (The Graph, Chainlink, OG), and modern React/Next.js frontends. Applying an economist's perspective to protocol design and incentive mechanics.

EXPERIENCE

Freelance Web3 Developer 2025 — Present
Independent · Maluku, Indonesia (Remote)

Self-directed progression from zero coding knowledge to full-stack Web3 developer. Built and deployed multiple production dApps — DeFi dashboards, on-chain analytics tools, and smart contract systems — spanning wallet integration, live market data, and decentralized infrastructure. Currently building TronicLens, a DeFi staking intelligence cockpit, as part of the ETHOnline 2026 hackathon.

Solidity · React · The Graph · Chainlink · wagmi · RainbowKit · Dune Analytics · OG

Market Analyst & Trader 2023 — 2025
Independent · Crypto & Multi-asset Markets

Active trader across crypto, forex, and equity markets. Developed analytical frameworks combining macro analysis, technical analysis (Fibonacci, MACD, SMC/BOS/CHoCH), and on-chain data.

Macro Analysis · Technical Analysis · DeFi · On-chain Data

PROJECTS

TronicLens ETHOnline 2026
React · Solidity · The Graph · Chainlink · OG · Reown AppKit

DeFi Staking Intelligence Cockpit — real-time whale detection, live ETH/USD & BTC/USD oracle feeds, on-chain governance (proposals, voting, timelock execution), decentralized AI insights (OG Compute TEE-verified), on-chain data archiving, smart alerts, and wallet connect via Reown AppKit.

→ troniclens.vercel.app

DeFi Dashboard Live
React · RainbowKit · wagmi · ethers.js · Dune API

Full-stack dApp with multi-wallet connection, real-time ETH balance, transaction history, IPFS metadata upload, and protocol analytics via Dune.

→ defi-dashboard-pi.vercel.app

Crypto Tracker Live
React · CoinGecko API

Real-time crypto price tracker with live market data, search, and responsive design.

→ crypto-tracker-pi-silk.vercel.app

EDUCATION

Bachelor of Development Economics 2021 — 2025
Universitas Dokter Husni Ingratubun (UNINGRAT) · Tual, Indonesia

ACHIEVEMENTS

ETHOnline 2026 — Accepted participant, ETHGlobal hackathon (Sep 4–16, 2026). Building TronicLens with OG Network, The Graph, and Chainlink integrations.

Foundry Testing — 107/107 tests passing, 98% coverage (StakingContract + GovernanceContract + StakingGovernance), CI/CD green on GitHub Actions.

The Graph Subgraph — tronic-staking v0.0.7 deployed to The Graph Network on Arbitrum One, with on-chain aggregation entities (StakerProfile, DailyStakingStats, ProtocolStats).

On-chain Governance — Full governance system deployed on Sepolia: create proposals, vote (Yes/No/Abstain), execute via timelock. Integrated with Reown AppKit wallet connect.

OG Network Integration — OG Storage + OG Compute TEE-verified AI insights, alongside live Chainlink ETH/USD and BTC/USD feeds, in one DeFi dashboard.
